## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The indicated allowability of claims 13, 17, and 19 is withdrawn in view of the newly discovered reference to Kurz. Rejections based on the newly cited reference(s) follow.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8, 9, 12-14, and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurz.

The Kurz reference discloses an internal substance delivery device (Figure 6) comprising a support frame 1, outwardly biased resilient arms (see col. 4, lines 40-44) which are capable of "interlocking" (see Figures 7 and 8), releasably receivable substance delivery means (the wound copper wire on the arms, see col. 4, lines 20-29), and a locator 7. Regarding claims 5 and 6, note that wire is flexible and has a round cross section). Regarding claim 9, see Figure 4.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3751

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kurz.

The Kurz reference discloses a device as discussed supra, but remains silent as to the material of the support frame. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the support frame from nylon, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In *Re Leshin*, 125 USPQ 416.

#### ***Allowable Subject Matter***

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
